April 4th: Doppler applications in abdomen
April 5th: Fetal Brain
April 6th: Current topics in OBGYN

Dear Colleagues,

It is with great pleasure that we announce our annual conference MUSKCON 2014.

*The highlight of this event is an entire day devoted to the **fetal brain**. Our lead overseas faculty is **Prof. Gustavo Malinger**, a pioneer in the field of fetal neurology.*

We will attempt to extensively cover the disorders of ventral induction and touch upon the acquired insults to the fetal brain. In addition to live demonstrations of fetal neurosonography we have earmarked enough time for working with three dimensional volumes of the fetal brain.

A workshop in Doppler applications in the abdomen and current topics in obstetrics and gynecology will complete the conference programme. Experts from our country will deal with these topics and share their immense experience with us.

We invite you to be a part of MUSKCON 2014.
