Dear colleagues,

It is with great pleasure that we announce **MUSKCON 2020, the Silver Jubilee conference of our society.**

The first day, in the two-day event, is devoted to the fetal brain. To help us understand the complexity of the brain, in health and disease, we have none other than Prof. Gustavo Malinger from Tel Aviv, Israel. We have put together a delectable range of topics which will aid in daily practice. A unique session on algorithmic approach to commonly encountered abnormal CNS findings will be a highlight.

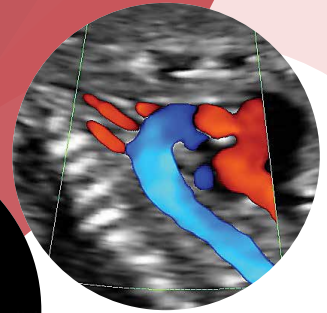

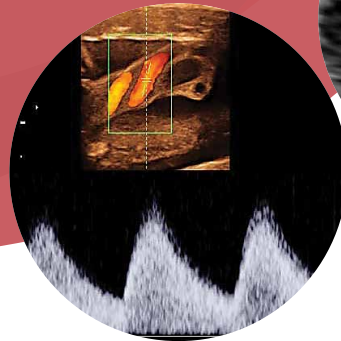

The second day features three mini symposia on fetal cardia, fetal growth, Doppler and niche areas of twin gestation. A fourth session will feature a 'How to' approach for dealing with common situations in day to day practice.

We have a galaxy of national speakers with years of practice and experience to address these topics.

Come, be a part of the 25th anniversary academic extravaganza - MUSKCON 2020.
